## Upcoming I-DEAS User Group Meeting Canceled

Announcing another Fermilab I-DEAS Users Group Meeting! Currently, only I-DEAS user group meetings are planned. If you would like to start another user group, let me know.

**I-DEAS User Group Meeting**
Wednesday, April 12, 2006, 9:00-11:00 AM
Hermitage Conference Room – ICB 2$^{nd}$ Floor East
Agenda:
1. What's New in I-DEAS 12
2. Using States - Part II
3. Q & A

## ANSYS 10 Install Instructions Available

ANSYS 10 Classic and Workbench are available for you to install. I have posted install instructions for ANSYS 10 at http://www-cad/ansys/index.html.

## I-DEAS TrueType Wireframe Fonts Now Available

A recent request by a user for more font options within the *Wireframe Fonts* command, prompted me to realize that the *TrueType* fonts option had not been enabled with the I-DEAS environment. So, I turned them on for all 5 TDMs. Now, when you run the *Wireframe Fonts* command within *MasterModeler*, you will have the option of using all of the TrueType fonts available on your PC. Note that this is PC dependent meaning that each PC can have more or less *TrueType* fonts than another PC.

## Protecting Your Data Using States in TDM

States have been implemented in every TDM to allow restricted access to data. Please see http://www-cad.fnal.gov/ideas/help/Protecting_Your_Data_Using_States_in_TDM.pdf for details.

## I-DEAS 12 Update

I-DEAS 12 has been tentatively planned for roll out sometime this Spring. An I-DEAS 12 test environment is being set up and testers will be needed. If you would like be a tester, please see your group CAD administrator. To read more about I-DEAS 12, go to http://www-cad/i-deas and click on the I-DEAS 12 Help Library hyperlink.

## What's New in I-DEAS 12 NX

The "What's New in I-DEAS 12 NX" information can be found at http://www-cad/ideas/. The direct link is: http://www-cad/ideas/help/help_lib_i12/LANG/English/bookshelf/bookshelf.htm.
