Organize Group Structure

- Facilitator: single point of contact
- Team: determine distribution of responsibilities
- Goal: establish common direction
- Timeline: what will be done by when

Four Phases of Research

Phase One:

- Is ASME Y14.41 being widely used? Why or why not?

Phase Two:

- How have companies successfully incorporated the standard in their move to 3D annotation?
- What are the specific obstacles the user community is faced with, preventing its use?

Four Phases of Research

Phase Three:

- Are all of the benefits of 3D GD & T fully recognized?

Phase Four:

- How can the user group help expedite industry change?
- Is specific training needed?

Other topics of discussion

Brainstorming/Open Forum

Conclusion

- Presentation of findings at 2007 PLM World Conference
- Recommendations to user community for further studies and future implementation strategies
