An Integrated Product Development Process

Mercury Marine uses a phase-gated product development process.

Goal: To provide an integrated framework that will support this process.

An Integrated Environment

Printed copies of this document are uncontrolled and may not be current.

System Setup

- Infrastructure
- Web Application Server framework
- Application Registry
- Teamcenter Security Services

Benefits

- One source for all product related information.
- Improves collaboration between project members.
- Information from multiple applications is linked, improving communication.

Limitations

- “Seamless” integration does not exist.
- Teamcenter Security Services breaks bi-directional linking.
- Little information/documentation on integrating Teamcenter applications.
- Difficulty in deciding “where to put what”.
 - E.g. Task management
